Desired position

Full stack developer
Part time, project work, remote work

Skills

Back end development

DevOps

Front end development

Agile and Scrum methods

Tech stack

PostgreSQL, MySQL, MongoDB, Redis, Sidekiq

Elasticsearch, Kibana, Grafana, Logstash, CollectD

REST API, Microservices

Ruby, Ruby on Rails, Sinatra, NodeJS, SailsJS

Ansible, Capistrano, Docker, Dokku, AWS

Javascript / Coffeescript, AngularJS, BackboneJS

TDD, BDD, Continuous integration

Phonegap / Cordova

Experience

May 2018 — present
fohlio.com
Full stack developer

Backend and frontend features refactoring. Integrations, code review, test coverage

July 2017 — December 2017
taxesforexpats.com
Back end developer,
Team Lead

Worked with team: code review, mentorship, improving working process.

February 2017 — May 2017
mobilecoach.com
Back end developer

Worked on refactoring of scenarios builder and implementing new features. Reduced time of test execution and increased test coverage.

January 2016 — January 2017

Wecudos Inc, UK
wecudos.com

Back end developer

Implemented booking and payments system, referral invites and background processes. Refactored back end and increased test coverage by 50%. Maintained REST API for mobile and web apps. Set up and provided load testing.

January 2016 — February 2016

Freelance

Back end developer

Developed parsers for five online shops with subsequent accumulation and analysis of data. 1TB of data stored with Elasticsearch. Collected different kind of data: prices, delivery time, discounts and etc every day. Deployment flow with Ansible and AWS. ElasticSearch, Kibana and PostgreSQL work in Docker containers. Docker-composer for controlling containers and linking to primary container.

April 2015 — January 2016

A&P Media, Russia
vice3.agency

Back end developer

Developed API for mobile applications. From the application architecture and choosing tech stack to implementation and final optimisations. Server deployment with Docker and Ansible. Sql-query optimizations.

March 2013 — April 2015

Brandymint LLC, Russia
brandymint.com

Full stack developer

Projects of varying complexity use different technologies. Depending on project size I worked in small team or alone. Databases used: MySQL, PostgreSQL, and noSQL databases like Redis, Mongo and etc. Built backend with NodeJS, Ruby, Rails, ExpressJS and frontend with backboneJS + Marionette. Also Cordova for mobile apps.

June 2012 — March 2013

Freelance

Web developer

Developed and supported websites with Ruby and NodeJS on the back end and BackboneJS on front end.

August 2011 — June 2012

Webium, Russia
webium.digital

Web developer

Developed and supported websites with PHP, Ruby and NodeJS.

Education

2006 — 2011

Ulyanov Chuvash State University, Cheboksary

Computer Science and Computer Engineering, Software for Computer Hardware and Automated Systems
